

I am very concerned that you are looking at the Low Power FM stations in such a positive light. In our area there are very few FM stations, and those are not low power. The one station that we like to listen to is K-LOVE at 88.1 and 91.1 in areas toward Denver. I urge you not to disturb the practices of such stations that already exist. They give much pleasure and have sound positive things to say that uplift all of us. The music is very beneficial. They do not have any commercials, which is great.
